

December 2, 2013 VTXml Release

1) Add SaleEffectiveDate and SaleExpirationDate to Distributor Config

Distributor Config has been updated to include the ability to update the SaleEffectiveDate and SaleExpirationDate on PolicyProduct at a specific product level for a distributor.

This is only at the specific product level and not the global level. Let us know if there is a use case for having these dates at the global Distributor Config level.

The screenshot displays the 'Distributor Config' interface with several exclusion tables and a jurisdiction selection dropdown.

Feature and Product Code Exclusions
